

Velio is a unique product which combines light spot and air valve into one ceiling element so that it meets high requirements of architects for a simple uniform ceiling structure. There is no more necessity to accept different design from different producers – one for lamps and other for HVAC diffusers. And even more. Velio has the potential to integrate other elements such as sensors, escape route signaling, and more.

No matter, if there are big open space rooms or small one person rooms as a toilet. It is suitable for the office buildings, but also for the family houses. Velio fits perfect to each situation.

It can be used as a solo light, diffuser or combining both. As a result you can see less elements than it is usual.

Now ceilings can have one homogenic premium design.

Made and designed in Slovakia

10 kWh/1000 h

Air/Luft/vzduch:
0-70m³/h (0-20 l/s)
L_{WA} 38dB

Light/Licht/svetlo:
1400 lm
13W
3000/4000 K

Producer/Hersteller/výrobca:
Doublair, s. r. o.
Pri vinohradoch 9798/269C

VENTILATION & LIGHT
IN ONE

/ Body: \

- base for all multispot components
- has a nominal connection dimension for ducts with \varnothing 125 mm
- universal for all types of decorative panels

/ Air flow regulation: \

- adjustable continuously for 20 - 100%
- with the indication of status of opening

/ Deflector: \

- for passive cooling of the LED module
- made from innovative heat-conductive plastic, that have never been used in such a range before
- directs air flow
- it is registered for patent protection world wide

/ Filter: \

- for fine air filtration
- to eliminate dusty ceilings and air ducts
- cleanable and also easily replaceable
- from polyurethane foam

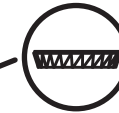

/ LED module: \

- provides good lighting for smaller rooms 1400 lm
- minimum consumption for economical operation – 13.5 W
- lifetime of 50 000 operating hours
- two possibilities of colors of light: 3000 K (warm white) and 4000 K (neutral white)

/ Decorative Panel: \

- for soundless air supply / exhaust with volume airflow up to 70 m³/h
- made from UV-resistant material
- in three colour designs: white, black, anthracite
- with a timeless design designed by Michalom Staškom

/ Diffusion part: \

- with minimal light loss - made of plexi glass with highly diffuse additives
- dispersing the light so that it does not see the individual illuminating LED points
